

DAVID LUCIAN

Self-taught
cybersecurity
professional

Profile Summary

I am a 20-year-old technical professional with experience in offensive cybersecurity and Linux environments like Kali Linux. Skilled in Python and Bash scripting, I identify vulnerabilities and deliver solutions. Native Spanish speaker with functional English, currently learning Dutch. Proactive and adaptable, aiming to grow in red teaming and cybersecurity.

Education

- | | | |
|----------------------------|---|--------------------------|
| • IES ALONSO DE
ERCILLA | Intermediate Vocational
Diploma in Microcomputer
Systems and Networks | Period:
• 2023 - 2025 |
|----------------------------|---|--------------------------|

full experience and projects*

Work Experience

- | | | |
|--------|--|--------------------|
| • MICA | Offensive Security
Programming Intern | Period:
53 days |
|--------|--|--------------------|

During my Erasmus+ internship at MICA in Leeuwarden, I developed Python scripts and tools focused on offensive cybersecurity tasks. I gained hands-on experience analyzing security vulnerabilities, automating tasks, and supporting penetration testing activities. This role enhanced my programming skills and deepened my understanding of real-world cybersecurity challenges.

- | | | |
|----------------------|-----------------------------|--------------------|
| • TERADOS
(SPAIN) | Cybersecurity Lab
Intern | Period: 30
days |
|----------------------|-----------------------------|--------------------|

Participated in a cybersecurity lab where I enhanced practical skills using Flipper Zero, Kali Linux tools, and solving Capture The Flag (CTF) challenges on Hack The Box (HTB). Gained hands-on experience in offensive security techniques and vulnerability analysis in a simulated environment.
